CB STATION

Your story, Our canvas

WE ARE CB STATION

As a vertically integrated company based out of Atlanta, Georgia, our mission is to create high-quality blanks in timeless designs that are stylish and functional for the personalized gift industry.

We started as a small mom-and-pop shop 10 years ago and have evolved into a full-fledged operation since then.

It's not enough to simply create good products though - we aim to provide opportunities where partners can succeed. In fact, it is directly because of our partners that we have grown to where we are today. Their suggestions - whether it be adding monogramming services, or placing an emphasis on sustainability, biodegradability, and eco-friendly practices - have been as valuable to us as their business.

It's important to us to look at the whole picture, not just the profit sheet. Because of this, we believe that helping people live good lives in a way that respects the environment will determine our success. Our factories and our design team not only provide customers with products that they can proudly sell, it supports over hundreds of employees and their families as well.

If you are interested in becoming a dealer, please fill out our dealer registration form or email us at cs@cbstation.com to learn about getting started.

WHO WE ARE

We are a wholesale company whose mission is to provide high-quality products that are stylish and functional for the personalized gift industry. What makes us unique, though? We believe just looking at the balance sheet isn't enough; you need to strive to help everyone around you live a better life. We are a woman-led company committed to quality, sustainability, and treating everyone like family.

COMMITMENT TO QUALITY

We want our partners to succeed by giving you the highest quality products we can. Our success depends upon yours. Canvas bags should be durable, and your customers will appreciate having a quality canvas bag that will last them for years.

SUSTAINABILITY

Sustainability is key. It's not enough for products to look good; they need to have as little impact on the environment as possible. Fashion needs to make sustainability a massive factor in creating products to give our planet and children a better future.
